

GROBA's maintenance contracts

At GROBA, we understand that the heart of seamless production lies in the reliability and longevity of your machinery. That's why we are excited to introduce our tailored Maintenance Contracts designed to meet your unique needs and preferences. With this maintenance contract, we entail scheduled upkeep and inspections to ensure optimal performance of your GROBA equipment.

GROBA's basic Maintenance Contract Includes the following:

- **Preventive Maintenance and Inspection**
- **Annual Oil (Filter) Change and Interface Relay Check, Lubrication, and Adjustment**
- **Periodic Tasks:** Checking, Adjusting, Calibrating, Technical Cleaning, etc.
- **Advice on Tooling Status**
- **Safety and Quality Checks**

What does such a process entail? Well, we start off with discussing which production lines are eligible for the maintenance contract and what is expected from both parties. Your personal needs are central during this process. Together with GROBA's experience, the contract will be prepared. Once an agreement is reached on the contract, the actions will be set in motion for you. This results in an agreement that incorporates GROBA's expertise while also meeting your requirements.

Several benefits come with GROBA's basic Maintenance Contract:

- **Optimal Operation:** Keeping your machines at their best
- **Extended Machine Lifespan:** Promoting sustainability
- **Reduced Downtime:** Structured maintenance for uninterrupted workflow
- **Clear Insight into Maintenance Costs:** Budgeting made easy
- **Training for Production Staff:** Empowering your team
- **Predictable Costs:** No surprises, just a clear annual maintenance budget
- **Expertise on Your Machine:** Since we have built your machine

For those seeking an even higher level of support, we also offer our *Advanced Maintenance Contract*, which includes advice and consultancy. After we have spent an entire day at your location observing your production lines, a detailed advisory report will be prepared to optimize your operations further.

Invest in the longevity and efficiency of your production with GROBA's Maintenance Contracts. Reach out to us today to discuss how we can tailor a solution to fit your exact needs, by sending an email to service@groba.eu. *Let's say goodbye to unreliable production lines!*
